 - iii) Urinary bladder

P.T.O.

**3. Attempt ALL of the following:**

- a) Name the 2nd cranial nerve.
 - b) The blood vessel which carry oxygenated blood from the lung to heart is _____.
 - c) Name the muscles of respiration.
 - d) Which hormone is secreted by testis?
 - e) Name the four fundamental taste.
 - f) Which neurotransmitter is responsible for muscle contraction?
 - g) Name the bones of elbow joint.
 - h) What are heart sound?
 - i) Define anatomy and physiology.
 - j) Name the fundamental tissues of the body.
 - k) Structural and functional unit of kidney is _____.
 - l) Name the bones of cranium.
 - m) The fertilization in female takes place in
 - i) Uterus
 - ii) Vagina
 - iii) Fallopian tube
 - iv) Ovary
 - n) Which of the following is property of skeletal muscle?
 - i) Muscle tone
 - ii) Muscle contraction
 - iii) Muscle fatigue
 - iv) All of the above
 - o) Organ of corti helps in
 - i) Hearing
 - ii) Balancing
 - iii) Vision
 - iv) All of the above
 - p) Exchange of gases at the cellular level in lungs and tissue is described as
 - i) Inspiration
 - ii) Internal respiration
 - iii) External respiration
 - iv) All of the above
 - q) _____ is the inner most nervous coat of the eye.
 - r) Which of following function belongs to bile juice?
 - i) Laxative action
 - ii) Fat digestion
 - iii) Buffer action
 - iv) All of the above
 - s) The term 'Proximal' refers to
 - i) Towards the front of body
 - ii) Towards the back of body
 - iii) The upper part nearest to the point of attachment
 - iv) In the midline
 - t) Write any two functions of 'CSF'.
-
